

Reverse 911... a leap forward in Contingency planning

- Powerful Contingency Planning tool notifies and tracks thousands of staff.
- Automatically dials out to pagers, cell phones, home phones, PDAs.
- Dispatch routine can call multiple numbers, (cascade), perform multiple attempts, deliver multiple messages per called party.
- Comprehensive status reports show who was contacted and when, time of response, even type of call (pager, cell phone, PDA).
- Also ideal for non-emergency applications, such as shift scheduling, and determining staff availability.
- Easy to program, manage and customize.
