

INSIDE DISPLAY WEEK

VOL. 4 | Fall 2022

A Triumphant Return

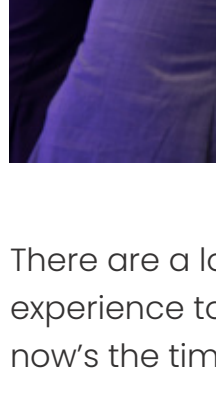

Display Week is returning to the "City of Angels," Los Angeles, California, May 21-26, 2023! Next year marks the 60th anniversary of the Society for Information Display's (SID) International Symposium, Seminar & Exhibition, and it's only fitting that it takes place where SID was "born" in 1962.

Display Week is where the global display community gathers annually to see the latest technologies, connect with colleagues and learn from the industry's most influential researchers, business leaders and like-minded professionals from across the entire supply chain. Since the first exhibition in 1963 – one year after the formation of SID – it has been a catalyst for leading-edge products and innovative thinking that propels the field forward. From the early beginnings of galvanometers and CRTs, through the evolution of LCD and OLED to today's innovations in AR/VR/MR, micro-OLED, wearables, flexible displays – and the myriad components, devices and applications that permeate our everyday lives – Display Week is the brain trust that brings together the world's best and brightest every year to advance the state of the industry in a way no other event can.

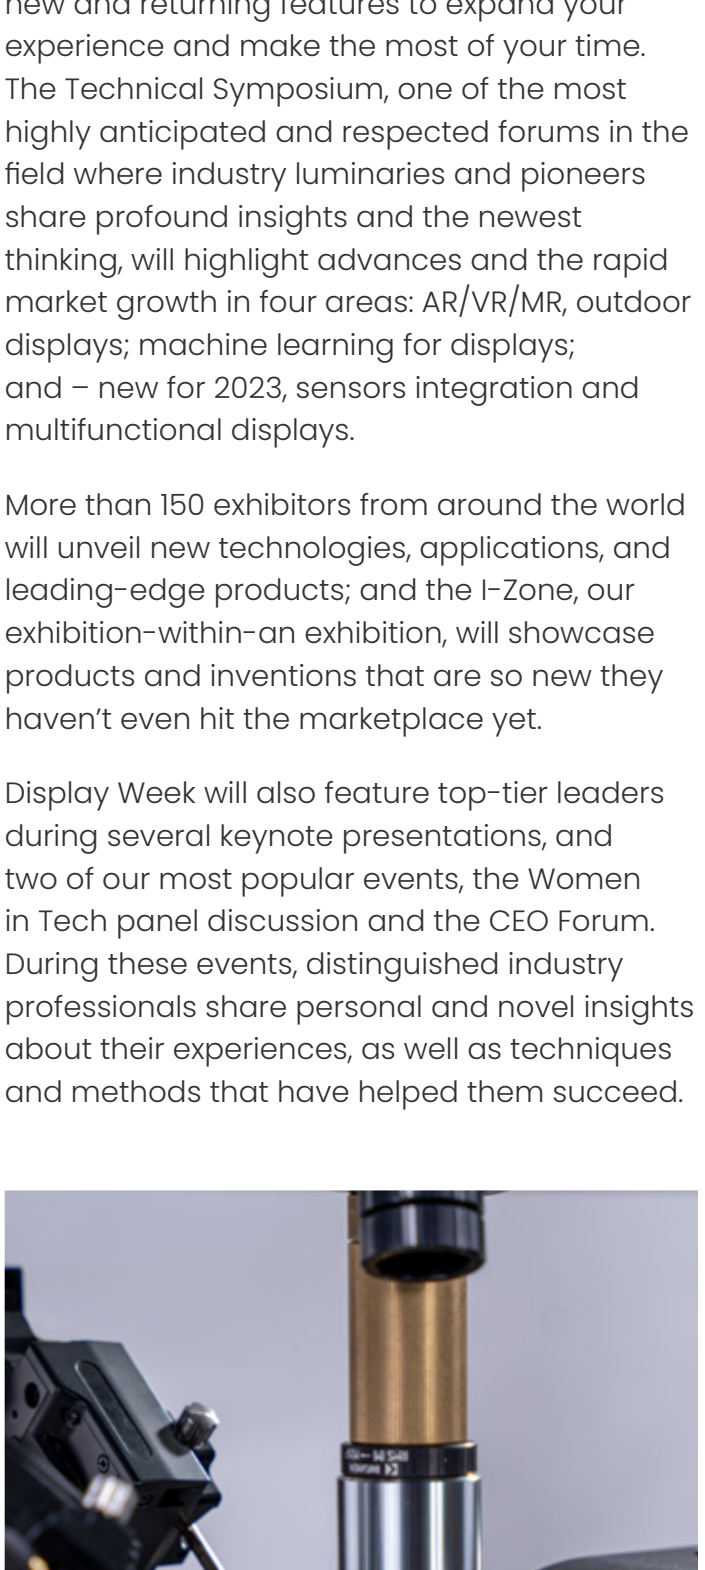

Additional learning opportunities can be found at the SID/DSCC Business Conference, and through our seminars and short courses that cover a wide variety of today's hottest topics. And our networking events will give you the chance to get up close and personal with movers and shakers from around the world!

No matter where you are in your career, or your field of focus in the ever-evolving landscape of electronic display and visual information technologies, Display Week 2023 is the place to see and be seen! Registration opens in February 2023, so mark your calendar and watch for future communications with more details about what's sure to be one of the best events of the year!

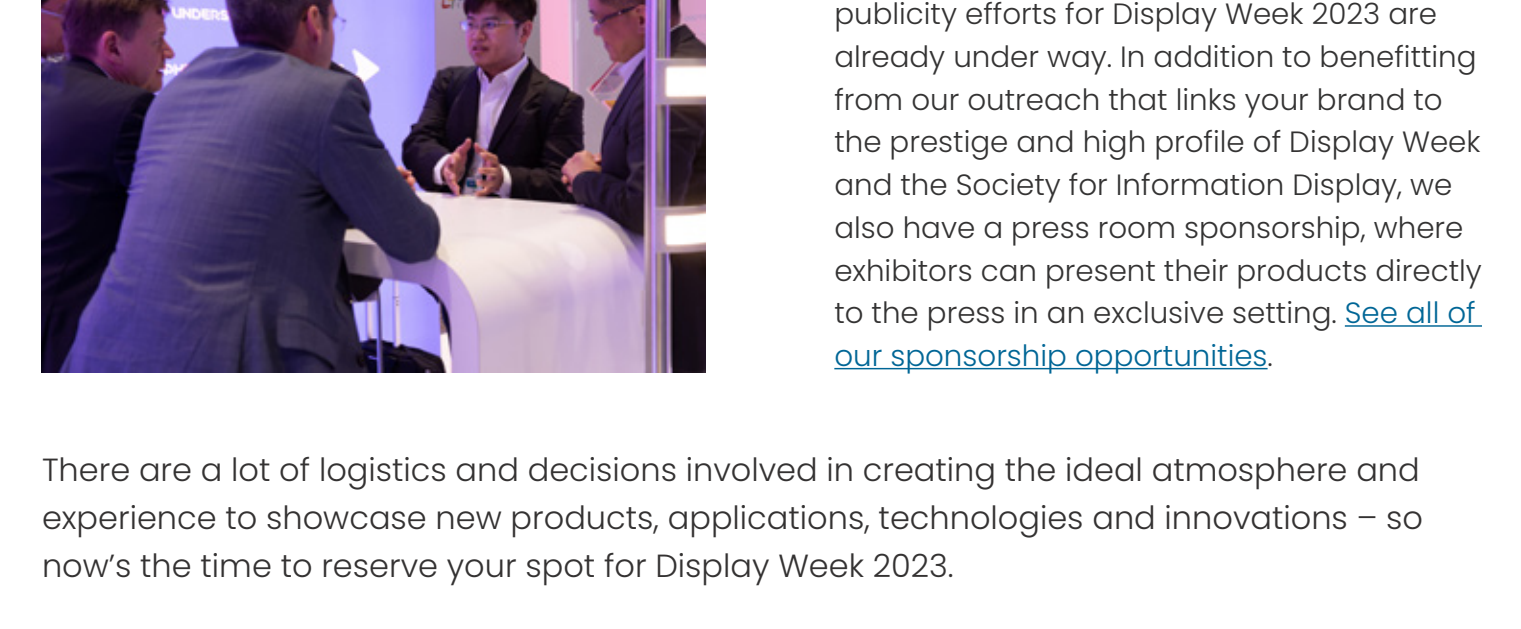

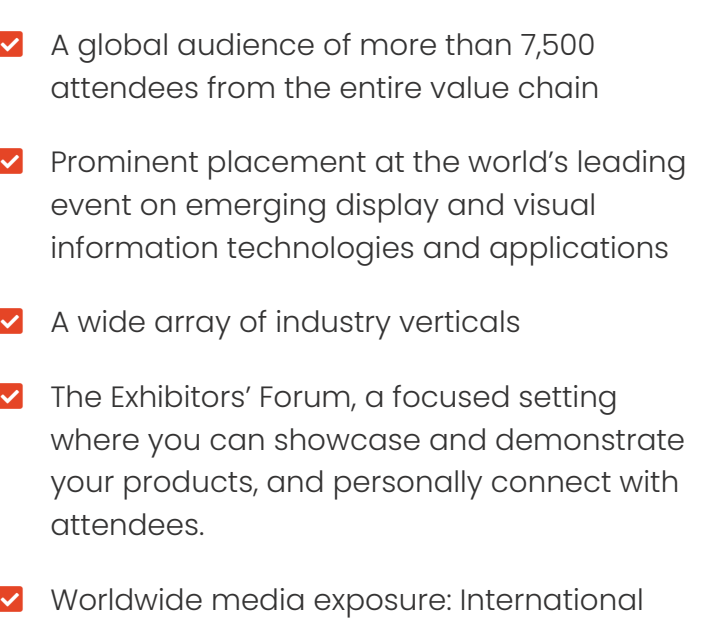

Happy Holidays,
Dr. Radu Reit
Marketing Chair
Society for Information Display

Display Week 2023 will fire on all cylinders with new and returning features to expand your experience and make the most of your time. The Technical Symposium, one of the most highly anticipated and respected forums in the field where industry luminaries and pioneers share profound insights and the newest thinking, will highlight advances and the rapid market growth in four areas: AR/VR/MR, outdoor displays; machine learning for displays; and – new for 2023, sensors integration and multifunctional displays.

More than 150 exhibitors from around the world will unveil new technologies, applications, and leading-edge products; and the I-Zone, our exclusive within-in-an exhibition, will showcase products and inventions that are so new they haven't even hit the marketplace yet.

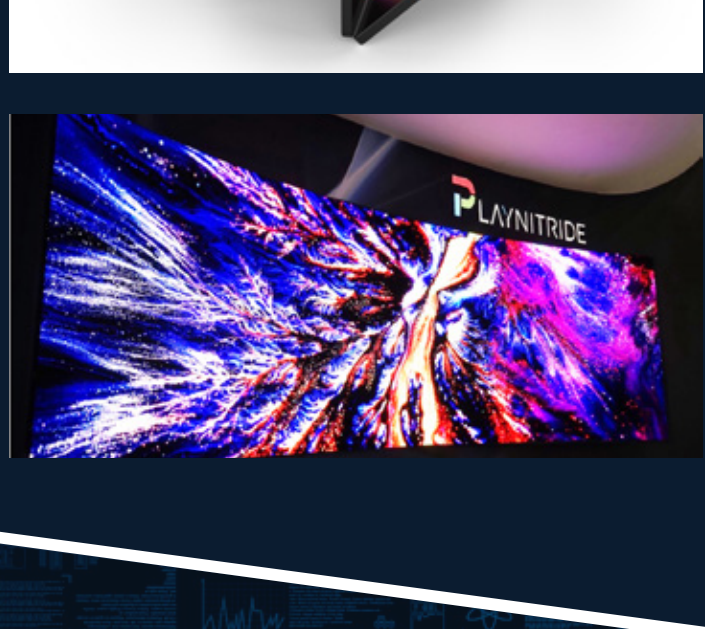

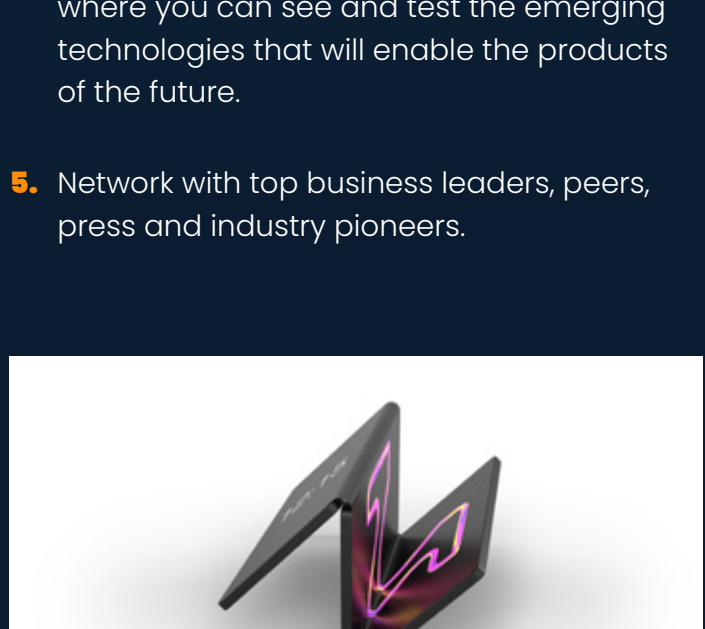

Display Week will also feature top-tier leaders during several keynote presentations, and two of our most popular events, the Women in Tech panel discussion and the CEO Forum. During these events, distinguished industry professionals share personal and novel insights about their experiences, as well as techniques and methods that have helped them succeed.

There's No Time Like the Present: RESERVE YOUR EXHIBITION SPACE NOW!

It's never too early to start planning for Display Week, where the world's electronic display industry connects!

Display Week 2023 will be held on-site at the Los Angeles Convention Center and offer a dynamic, interactive experience for exhibitors and attendees alike. [Find out more about exhibition opportunities.](#)

Consider these advantages of exhibiting at Display Week 2023:

- ✔ A global audience of more than 7,500 attendees from the entire value chain
- ✔ Prominent placement at the world's leading event on emerging display and visual information technologies and applications
- ✔ A wide array of industry verticals
- ✔ The Exhibitors' Forum, a focused setting where you can showcase your products, and personally connect with attendees.
- ✔ Worldwide media exposure: International publicity efforts for Display Week 2023 are already under way. In addition to benefiting from our outreach that links your brand to the prestige and high profile of Display Week and the Society for Information Display, we also have a press room sponsorship, where exhibitors can present their products directly to the press in an exclusive setting. [See all of our sponsorship opportunities.](#)

There are a lot of logistics and decisions involved in creating the ideal atmosphere and experience to showcase new products, applications, technologies and innovations – so now's the time to reserve your spot for Display Week 2023.

Top 10 Reasons to Attend Display Week 2023

1. See the latest advancements and products in the display and visual information technologies industry before anyone else.
2. Learn from global leaders about the trends and future of the industry.
3. Gain an edge on the competition.
4. Visit Display Week's exclusive I-Zone, where you can see and explore the emerging technologies that will enable the products of the future.
5. Network with top business leaders, peers, press and industry pioneers.

6. Build and strengthen relationships.
7. Expand your knowledge with education and training sessions.
8. Generate new leads for strategic alliances and potential customers.
9. Save on yearly travel costs by meeting with multiple partners, potential purchasers, suppliers and clients in one place.
10. Los Angeles is one of the most exciting cities in the world!

Call for Papers

Your Display Research Paper Belongs at Display Week 2023

Deadline for Submissions: Dec. 1, 2022
Deadline for Late-News Abstracts/Summaries: Jan. 20, 2023

Present your original research and insights at the 60th International Society for Information Display Technical Symposium at Display Week, taking place May 21-26, 2023, in Los Angeles. Display Week is the world's leading showcase for display-related innovations and technical advances.

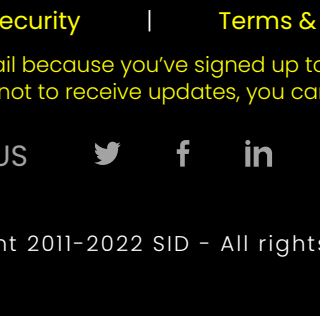

The Society for Information Display's Technical Program at Display Week is the ultimate platform for unveiling new discoveries in electronic display and visual information technology.

In addition to the broad range of technical areas [listed](#) in the Call for Papers, the Display Week 2023 Technical Symposium will place emphasis on four special topics of interest to address rapid growth in the following areas:

- Sensors Integration and Multifunctional Displays (New for 2023!)
- AR/VR/MR
- Outdoor Displays
- Machine Learning for Displays

We welcome original papers on all aspects of the research, engineering, application, evaluation, and utilization of displays and visual information technology.

Membership Has Benefits

Powering the Display Industry for 60 Years

The Society for Information Display (SID) is the only organization dedicated to the propagation of electronic display and other visual information technologies from concept to market.

When you join SID, you're a part of a global community at the nexus of a thriving and ever-growing industry. As a member, you can:

- ✔ Connect with industry pioneers and international business leaders
- ✔ Advance your career and understanding with extraordinary learning opportunities
- ✔ Explore professional opportunities through our online job marketplace
- ✔ Take advantage of special registration rates for SID conferences, including Display Week
- ✔ And more!

Visit our [website](http://www.sid.org) for more information about how you can be a part of the display revolution.

2023 Display Industry Awards

Nominations Opening Soon for the Industry's Most Prestigious Honors

The Display Industry Awards (DIA) are the display industry's most prestigious honor, given annually since 1995 by the Society for Information Display to recognize the best display products or applications introduced to the market during the previous calendar year. There are three award categories: Display of the Year, Display Application of the Year, and Display Component of the Year. Every year, winners in each category are selected by the Display Industry Awards Committee based on nominations from SID members and non-members alike. The awards are announced and presented at Display Week, the annual SID International Symposium, Seminar and Exhibition.

2023 DIA nominations will be open in November. Watch your email or check our [website](#) for more information about the nomination process and timeline.

I-Zone

Step Into the I-Zone

The 12th annual Innovation Zone at Display Week will begin taking applications in November 2022. The I-Zone, one of Display Week's most popular events, showcases never-before-seen display and imaging technology, and takes place on the exhibition floor.

I-Zone participation is based on a competitive selection process and is open to start-ups, small companies, universities, government labs and independent labs.

"We're looking forward to seeing the next round of innovations from industry and academia," says Vignesh Sanmugam, Chair of the I-Zone at Display Week. "I-Zone represents the perfect opportunity for small companies, startups, and academic research arms to show their prototypes to the greater display and imaging community."

2023 I-Zone applications are being accepted through March 24, 2023. For more information about requirements and deadlines, visit our [website](#) or email I-Zone@sid.org.
