Display Week 2022 was in full swing at the San Jose Convention Center, where more than 7,500 attendees took part in our first on-site exhibition in three years. Over 150 exhibitors shared the latest and greatest tech and products the world has been waiting to see,

while industry notables and legendary pioneers drew global audiences during the International Technical Symposium, keynote sessions, business conference and special events. "We couldn't have been more pleased with the turnout this year – not only from attendees, but also from the display community at large,"

said Achin Bhowmik, president of the Society for Information Display. "More than 150 exhibitors joined us to show their confidence in our onsite return, and our Technical Symposium presenters, keynote speakers and special forum panelists joined without hesitation to take part in this historical event, which marked the 60th anniversary of SID. "It was wonderful to connect with our community in person again, and be able to offer the multi-faceted on-site experience that's so important to the industry," he

continued. "And, recognizing that the pandemic brought travel challenges for many of our colleagues and members from around the world, Display Week 2022 also offered virtual access for attendees to join the excitement remotely."

ow's The Time

Display Week 2023 will be held on-site May 21-26 in Los Angeles, CA. Take advantage of

fresh areas and emerging technologies, including conformable wearable displays; hyper-realistic displays (AR/VR/MR); machine learning for displays; and outdoor displays. Additionally, our all-star line-up of keynote speakers featured forward-thinking business leaders from LG Display Co., Meta Reality Labs and BOE, who shared insights about the state of some of today's top technologies and applications and where the industry is going next. Learning opportunities abounded all week with the SID/DSCC Business Conference the largest conference of its kind devoted to a supply chain approach to the market – where attendees had the opportunity to understand the market and technology

outlook for TVs, smartphones, IT displays and AR/VR. And during our Women in Tech and CEO Forum panel discussions, world-renowned business leaders shared their personal insights, experiences and advice for success in an ever-changing landscape.
